Given under my hand,
On November 16, 2020

Todd Schmidt
School District Clerk

REGULAR MEETING MINUTES
BOARD OF EDUCATION – SCHOOL DISTRICT OF COLBY
MONDAY, OCTOBER 26, 2020
COLBY DISTRICT/EDUCATION CENTER

The Regular School Board Meeting on October 26, 2020 was called to order at 6:30 PM at the Colby High School Theater by Board President, William Tesmer. Members present were: William Tesmer, Todd Schmidt, Cheryl Ploeckelman, Teri Hanson, Jean Schmitt and David Decker. Also present were Superintendent Steven Kolden and Kristen Seifert. The meeting notice was posted according to the requirements of the open meeting law. Eric Elmhorst was absent.

Four community members addressed the Board regarding the mandatory mask rule. This item will be placed on the November board meeting agenda.

Mr. Kolden updated the Board regarding: Third Friday Count; Open Enrollment; Covid-19.

Strategic Planning Progress Monitoring – No update.

Motion by Mr. Decker, seconded by Mrs. Schmitt to approve the consent agenda as presented:

Minutes from the September 21, 2020 Regular Board Meeting

Resignation of Cheryl Haas, High School Lunchroom Computer Aide

Resignation of Cheryl Beyerl, Middle School Lunchroom Computer Aide

Resignation of Darrin Lampe, High School Evening Custodian

Accept with gratitude the donation of cordless headset for football and track from TSF Construction, LLC.

Voice vote – motion carried

Motion by Mrs. Ploeckelman, seconded by Mr. Decker to approve the receipts and invoices as presented. Voice vote – motion carried

Motion by Mrs. Ploeckelman, seconded by Mr. Decker to establish a district all property tax levy for 2020-21 at \$3,468,657 with a tax levy mill rate of 9.11. Voice vote – motion carried.

Motion by Mrs. Ploeckelman, seconded by Mr. Schmidt to approve a 2020-21 Fund 10 tax levy of \$2,392,469 and a Fund 80 tax levy of \$70,000 and a Fund 38 (non-referendum levy) of \$79,188 and a Fund 39 (referendum approved) tax levy of \$927,00. Voice vote – motion carried.

Motion by Mr. Schmidt, seconded by Mrs. Schmitt to approve second reading of NEOLA policies: 0000 Bylaws; 1000 Administration; 2000 Program; 3000 Professional Staff; 4000 Support Staff. Voice vote – motion carried.

The Board scheduled meetings.

Motion by Mrs. Schmitt, seconded by Mr. Decker, to adjourn the meeting. Voice vote – motion carried. Meeting adjourned at 7:12 PM.

Respectfully Submitted: Kristen Seifert, Reporting Secretary

Convention 2021

WISCONSIN STATE EDUCATION CONVENTION
January 20-22, 2021

Virtual Registration Information

Event Registrations (log in required)

STANDARD REGISTRATION: \$240.00 per person

CANCELLATION DEADLINE: JAN. 8, 2021 – NO REFUNDS ISSUED AFTER JAN. 8, 2021

GROUP RATE REBATES: (per organization)

After the convention, school districts and CESAs will be provided a rebate if registering

five or more board members and/or administrators at the following levels:

5-8 registrants: 10% rebate

9 or more registrants: 15% rebate

The rebate will be based on total paid registration costs for the organization.

Rebates will begin to be issued in mid-February. The number of registrants excludes

canceled and guest registrations.

Registrants do not have to attend the live convention

to be eligible for the rebate. They may opt

to access the recordings only.
As a professional courtesy, each person
accessing the virtual convention
should be a registered attendee.

Dennis,

10-19-20

I'm sorry I rushed out, so
halls didn't get done. Problems
at home... again. This is
seeming impossible to do
with kids at home I hope
you understand. This is my immediate
resignation. I hate to do it
this way. I would put 2 weeks
in but it isn't worth the
risk with covid. I wish you
all well. And am sorry
again for leaving this way.

-Dakota

80001	11/06/2020	GUITAR CENTER	ARINV55657	Acoustic guitars and bags, lollipop drums. I need another acoustic guitar for class as class sizes have increased. This will ensure every student will have one to play. Two more guitars will ensure that if one is in need of repairs that every student will still have one to play. Or if a student moves into the district I would not have enough guitars. Guitar bags are breaking at the seams with zippers breaking. I would like a classroom set of Lollipop drums so all students can utilize and experience drums since we do not have a classroom set of drums for them to utilize at this time. These drums have handles so younger students and older students all can use it.	1022021033	189.00	10 E 100 411 125400 000	GENERAL FUND/VOCAL MUSIC/GENERAL SUPPLIES

EMERGENCY ORDER #1

Relating to Requiring Face Coverings

WHEREAS, Wisconsin is in the midst of a pandemic that is growing at a near-exponential rate, causing illness and death that is devastating Wisconsin families, straining our health care system, and crippling our economy;

WHEREAS, the only way Wisconsinites can stay safe, save our health care system, and revitalize our economy is to slow the spread of COVID-19;

WHEREAS, without a vaccine or more effective means of treating the disease, the only tools we have to slow the spread of the disease is to stay apart and wear a mask when we cannot stay apart;

WHEREAS, college and university students are driving the increase in cases, with the highest rate of new COVID-19 cases in 18-24 year-olds;

WHEREAS, face coverings are a proven, effective way to slow the spread of COVID-19 without having a significant impact on people's day-to-day lives;

WHEREAS, without measures to slow the spread of COVID-19, especially among the college-age population, Wisconsin and Wisconsinites will suffer from more unnecessary illness, vulnerability from an overwhelmed health care system, and insecurity from an unstable economy;

WHEREAS, "Our Constitution principally entrusts '[t]he safety and the health of the people' to the politically accountable officials of the States 'to guard and protect.'" *S. Bay United Pentecostal Church v Newsom*, 140 S. Ct. 1613, (Mem)-1614 (2020) (quoting *Jacobson v. Massachusetts*, 197 U.S. 11, 38 (1905));

WHEREAS, Section 323.12(4)(b) of the Wisconsin Statutes authorizes the Governor to issue "such orders as he or she deems necessary for the security of persons and property" during an emergency; and

WHEREAS, based on input from state and local public health officials, medical professionals, and business leaders, I have determined that a statewide face covering requirement is necessary to protect persons throughout the State of Wisconsin from COVID-19.

NOW, THEREFORE, I, TONY EVERS, Governor of the State of Wisconsin, by the authority vested in me by the Constitution and the laws of this state, and specifically Section 323.12 of the Wisconsin Statutes, hereby order the following:

1. DEFINITIONS.

- a. "Enclosed space" means a confined space open to the public where individuals congregate, including but not limited to outdoor bars, outdoor restaurants, taxis, public transit, ride-share vehicles, and outdoor park structures.

- b. "Face covering" means a piece of cloth or other material that is worn to cover the nose and mouth completely. A "face covering" includes but is not limited to a bandana, a cloth face mask, a disposable or paper mask, a neck gaiter, or a religious face covering. A "face covering" does not include face shields, mesh masks, masks with holes or openings, or masks with vents.
- c. "Physical distancing" means maintaining at least six feet of distance from other individuals who are not members of your household or living unit.

2. FACE COVERING REQUIRED. Every individual, age five and older, in Wisconsin shall wear a face covering if both of the following apply:

- a. The individual is indoors or in an enclosed space, other than at a private residence; and;
- b. Another person or persons who are not members of individual's household or living unit are present in the same room or enclosed space.

Face coverings are strongly recommended in all other settings, including outdoors when it is not possible to maintain physical distancing.

3. EXCEPTIONS.

- a. Individuals who are otherwise required to wear a face covering may remove the face covering in the following situations:
 - i. While eating or drinking.
 - ii. When communicating with an individual who is deaf or hard of hearing and communication cannot be achieved through other means.
 - iii. While obtaining a service that requires the temporary removal of the face covering, such as dental services.
 - iv. While sleeping.
 - v. While swimming or on duty as a lifeguard.
 - vi. While a single individual is giving a religious, political, media, educational, artistic, cultural, musical, or theatrical presentation for an audience, the single speaker may remove the face covering when actively speaking. While the face covering is removed, the speaker must remain at least 6 feet away from all other individuals at all times.
 - vii. When engaging in work where wearing a face covering would create a risk to the individual, as determined by government safety guidelines.
 - viii. When necessary to confirm the individual's identity, including when entering a bank, credit union, or other financial institution.
 - ix. When federal or state law or regulations prohibit wearing a face covering.
- b. In accordance with [CDC guidance](#), the following individuals are exempt from the face covering requirement in Section 2:

- i. Children between the ages of 2 and 5 are encouraged to wear a mask when physical distancing is not possible. The CDC does not recommend masks for children under the age of 2.
- ii. Individuals who have trouble breathing.
- iii. Individuals who are unconscious, incapacitated, or otherwise unable to remove the face covering without assistance.
- iv. Individuals with medical conditions, intellectual or developmental disabilities, mental health conditions, or other sensory sensitivities that prevent the individual from wearing a face covering.
- v. Incarcerated individuals. The Wisconsin Department of Corrections shall continue to comply with COVID-19 protocols to ensure the health and safety of its staff and individuals in its care. Local governments are strongly encouraged to continue or create COVID-19 protocols to ensure the health and safety of their staff and individuals in their care.

4. LEGISLATURE AND JUDICIARY. State facilities or offices under the control of the Wisconsin State Legislature or the Wisconsin Supreme Court are exempt from this Order. The Wisconsin State Legislature and the Wisconsin Supreme Court may establish guidelines for face coverings that are consistent with the specific needs of their respective branches of government.

5. PRESERVATION OF MEDICAL SUPPLIES. To conserve limited supplies of N95 masks and other medical-grade supplies, individuals are discouraged from using such supplies as face coverings.

6. LOCAL ORDERS. This Order supersedes any local order that is less restrictive. Local governments may issue orders more restrictive than this Order.

7. ENFORCEMENT. This order is enforceable by civil forfeiture of not more than \$200. Wis. Stat. § 323.28.

8. SEVERABILITY. If any provision of this Order or its application to any person or circumstances is held to be invalid, the remainder of the Order, including the application of such part or provision to other individuals or circumstances, shall not be affected and shall continue in full force and effect. To this end, the provisions of this Order are severable.

9. DURATION. This Order shall enter into effect immediately. This Order shall expire on November 21, 2020, or by a subsequent superseding emergency order.

IN TESTIMONY WHEREOF, I have hereunto set my hand and caused the Great seal of the State of Wisconsin to be affixed. Done at the Capitol in the City of Madison this twenty-second day of September in the year of two thousand twenty.

Required Face Coverings

Wis. Stat. § 120.12(1) states that the school board of a common school district shall “have the possession, care, control, and management of the property and affairs of the school district.”

Wis. Stat. § 120.13 states that the school board of a common school district may “do all things reasonable to promote the cause of education.” Wis. Stat. § 118.001 states, “The statutory duties and powers of school boards shall be broadly construed to authorize any school board action that is within the comprehensive meaning of the terms of the duties and powers, if the action is not prohibited by the laws of the federal government or of this state.”

School Board Action: July 20, 2020

10.06 Discuss / Possible Action of the Requirement of Face Masks/Shields

Passed 7-0; Motion to authorize the Superintendent to require face masks for staff and students as deemed essential for the health and safety of students and faculty.

School Board Action: September 21, 2020

10.05 Discuss / Consider Action Regarding Mask Mandate Effective 9/28/2020

Passed 7-0; Motion to reaffirm Board action in July; authorizing the Superintendent to require face masks for staff and students as deemed essential for the health and safety of students and faculty.

Administrative Guideline for Facemask Exemption: Provides for an exemption from mask (not shields) when supported by authorized medical professional.

SIGNATURE OF HEALTH CARE PROFESSIONAL (MD OR DO)/PA/APNP*:

* PHYSICIANS may authorize Nurse Practitioners to stamp the waiver with the physician's signature or the name of the clinic with which the physician is affiliated

Colby School District Physical Education Mask Procedures

- **Come in with masks on.**
- **Running, masks stay on.**
 - If they choose to walk, they must be alone and they can take a quick mask break by pulling it away from their face or pulling it down below their nose.
- **Warm-ups (in lines, poly spots, spread out) masks can come down as they are far enough apart.**
 - This would include when they are spaced and we need to talk to them.
- **Once back into activity, masks are on.**
 - We all give mask breaks at different times depending on activity. For example, between games, switching areas, etc.
- **Mask breaks:**
 - Where they are away from the group.
 - Individually on a poly spot.
 - Warm up spots (when spaced out).
 - Walk to the door/doorway.
- **If a mask comes down during play, allow them to finish and put them back up.**
 - They should not be defiant about this. If it comes down to insubordination, then it would be a mask violation.
 - We are working with students as we know that a mask can come down during physical activity and give them friendly reminders; verbally and non-verbally.
- **Remind them that while in the locker room, they need to only take the mask down/off to change. Stress to them about getting in/out quickly!**
- **Remind students about washing hands and/or using sanitizer when coming to class and leaving class.**
- **We will address our classes about medical issues. This is handled individually as we have done in the past.**

SCHOOL DISTRICT OF COLBY EDUCATION CENTER

Dr. Steven Kolden, Superintendent

ELECTROSTATIC MESH MASKS

November 5, 2020

We were asked to check on the “acceptability” of mesh face coverings and electrostatic mesh masks. The answer from school health at the Department of Public Instruction was;

“This is the statement in the current emergency order. So you will need to look at the mask and see if it fits the wording below and determine if it is approved or not.

“Face covering” means a piece of cloth or other material that is worn to cover the nose and mouth completely. A “face covering” includes but is not limited to a bandana, a cloth face mask, a disposable or paper mask, a neck gaiter, or a religious face covering. A “face covering” does not include face shields, mesh masks, masks with holes or openings, or masks with vents.”

According to this statement from the DPI and the Governor’s order, mesh masks would NOT qualify as a face covering per definition.

now there are kids coming to school with mesh masks? As in like window screen masks? Might I suggest specifying what a mask is. Perhaps the CDC recommendations would be a place to start. If they don't want to follow the rules they need to go virtual, enough is enough.

mesh masks

Steve Kolden 11/10/2020 9:57 AM CST

We were asked by parents to check on the "acceptability" of mesh face coverings and electrostatic mesh masks. The answer from school health at the Department of Public Instruction was;

"This is the statement in the current emergency order. So you will need to look at the mask and see if it fits the wording below and determine if it is approved or not.

"Face covering" means a piece of cloth or other material that is worn to cover the nose and mouth completely. A "face covering" includes but is not limited to a bandana, a cloth face mask, a disposable or paper mask, a neck gaiter, or a religious face covering. A "face covering" does not include face shields, mesh masks, masks with holes or openings, or masks with vents."

According to this statement from the DPI and the Governor's order, mesh masks would NOT qualify as a face covering per definition.

Mask Mandate

Raymond, Natalie <nraymond@colby.k12.wi.us>

Wed, Oct 28, 2020 at 8:17 AM

To: Steven Kolden <skolden@colby.k12.wi.us>

Dear Steve,

I completely agree with your decision to implement a more restrictive mask mandate. As a teacher it makes me feel that my safety is important and makes me more comfortable in the building among students. As a parent of students attending in the district, it makes me feel that my kids safety is being taken seriously and important.

--

Sincerely,

Natalie Raymond
HS. Sp. Ed. Teacher

Mask Mandate

1 message

Hagen, Michele <mhagen@colby.k12.wi.us>

Wed, Oct 28, 2020 at 8:58 AM

To: "Kolden, Steven" <skolden@colby.k12.wi.us>, Michele Hagen
<mhagen@colby.k12.wi.us>

I fully support the district's decision on the mask mandate. Studies have shown that wearing a mask does help to stop the spread of the virus. Wearing a mask is the least that a person can do to help with this. We are exposed to a lot of people in a day with a lot of potential to spread the virus. The mask mandate protects all of our staff and students. Your mask protects me, and my mask protects you. If we all do our part, maybe we can get this under control. The mask mandate is the right thing to do. Thanks for listening.

I feel very strongly that our students should be wearing masks while in our buildings. There is no way we can social distance with the number of children we have and 6 year olds are not the most efficient hand washers! I have not heard one of my children complain about wearing a mask this year and they are very compliant because they want the school to stay open! Please pass on to our Board (along with kudos for hiring a school nurse)!

Face Mask Effects of CO₂, Heart Rate, Respiration Rate, and Oxygen Saturation on Instructor Pilots

Andrew R. Dattel
Embry-Riddle Aeronautical University

Nicola M. O'Toole
Embry-Riddle Aeronautical University

Guillermina Lopez
Embry-Riddle Aeronautical University

Kenneth P. Byrnes
Embry-Riddle Aeronautical University

The COVID-19 pandemic has required people to take new measures to mitigate the spread of the communicable virus. Guidelines from health organizations, government offices, and universities have been disseminated. Adherence to these guidelines cannot be more critical for flight training. This study explored the effects face masks had on CO₂, heart rate, respiration rate, and oxygen saturation while wearing a face mask at an oxygen level simulated to 5,000 feet. Thirty-two instructor pilots (IP) volunteered to participate in the study. IPs spent 90 minutes in a normobaric chamber while wearing a cloth face mask or a paper face mask. Participants were measured before entering the chamber, at the 15-minute mark, at the 45-minute mark, at the 90-minute mark, and after exiting the chamber where they briefly removed their mask for a final measurement. No differences were found between type of face mask. Wearing face masks did not present any potential health or safety issues for the IPs. However, IPs did report moderate dislikes (e.g., comfort, issues with fatigue, restriction of movement) of wearing face masks. Although face masks may be a nuisance, it does not appear to create any health or safety issues at a simulated altitude of 5,000 feet.

Recommended Citation:

Dattel, A.R., O'Toole, N.M., Lopez, G., & Byrnes, K.P. (2020). Face Mask Effects of CO₂, Heart Rate, Respiration Rate, and Oxygen Saturation on Instructor Pilots. *Collegiate Aviation Review International*, 38(2), 1-11. Retrieved from <http://ojs.library.okstate.edu/osu/index.php/CARI/article/view/8038/7412>

The outbreak of COVID-19 has brought about some drastic changes to our way of life. As more is learned about the virus, cities and counties look to protect citizens and allow a return to normal. The Centers for Disease Control and Prevention (CDC) (2020) issued a recommendation that citizens wear cloth masks to protect themselves and others.

Many aspects of day-to-day life can be adjusted to allow for social distancing to help reduce the risk of community-based spread of COVID-19. The unique nature of flight training does not allow for social distancing in the aircraft. When Embry-Riddle Aeronautical University decided to resume flight training, face masks usage for both instructor pilots (IP) and students were one of the many safety precautions that were made mandatory.

After a few weeks of flight training some of the IPs expressed concerns about discomfort from wearing a mask and some said face masks cause them to feel fatigued. During respiration, a gas exchange occurs when oxygen is inhaled and absorbed into the body and carbon dioxide (CO_2) is exhaled. When exhaling into a mask, there is a potential to inhale a greater amount of carbon dioxide, due to the exhaled carbon dioxide being trapped between the face and mask. One symptom of an excess of carbon dioxide in the blood, or hypercapnia, is fatigue (Jewell, 2005). Carbon dioxide can be measured in the air exhaled, by using a capnograph. A normal amount of carbon dioxide when measured by a capnograph is between 35 and 45 mm HG (Sullivan, 2015). If the mask is trapping carbon dioxide rich air, it could result in not enough oxygen being brought into the lungs during respiration. Lack of oxygen being absorbed through respiration could cause hypoxia. The Cleveland Clinic lists the symptoms of hypoxia ranging from shortness of breath, to confusion and death (Hypoxemia, n.d.). The amount of oxygen in a person's blood can be measured using a pulse oximeter. A normal pulse oximeter reading will vary between 95-100% (Mayo Clinic, 2018). The effect of hypoxia due to an increase in altitude in non-pressurized aircraft has been well documented and is required to be taught at the Commercial pilot level (FAA, 2015). Pilots are trained to know what symptoms to look for and how best to react.

Relatively little research has been conducted regarding the physiological effects of wearing a mask. Roberge, Coca, Williams, Powell and Palmiero (2010) conducted a study with healthy health care workers using filtering facepiece respirators (FFR) or N95 masks. The study looked at differing workloads for a 1-hour duration and studied, CO_2 as one of the many physiological effects. The study concluded that there were no significant physiological effects of wearing an FFR for 1 hour. However, two of the participants' peak CO_2 reached 50 mm HG at the end of the 1-hour period, suggesting that use of this type of mask beyond an hour may have negative effects. It is important to note that an FFR is designed to fit tightly to the face so it can filter out 95% of airborne particles unlike a cloth or paper/surgical mask (Center for Devices and Radiological Health, n.d.).

Schmidt (2020) quoting a representative from the CDC:

The CO₂ will slowly build up in the mask over time. However, the level of CO₂ likely to build up in the mask is mostly tolerable to people exposed to it. It is unlikely that wearing a mask will cause hypercapnia. (para. 5)

A later study by Roberge et al., (2012) considered the physiological effects of wearing a surgical mask. Participants walked on a treadmill for 1 hour wearing a surgical mask and for an additional hour without a mask while various physiological measurements were taken. In the analysis, Roberge et al. concluded that there was no physiological impact from wearing a surgical mask. There was a statistically significant rise in transcutaneous carbon monoxide; however, it would not be medically significant in a healthy individual. The CO₂ levels still remained in the normal range between 35 to 45 mm HG.

No studies relating to physiological effects of face mask use in an aviation context have been found. This study looked at the amount of carbon dioxide exhaled over time at a simulated altitude of 5,000 feet. Additionally, a comparison was made between paper/surgical masks and cloth masks.

Methodology

Participants

Thirty-two (26-male, 6-female) instructor pilots volunteered to participate in this study. Mean age of participants was 24.31 years ($SD = 2.98$). All participants were currently employed and received the IP hourly rate for the 2 hours in the study. Half the participants wore a cloth face mask during the study and the other half wore a paper/surgical face mask.

Materials

The Smiths Medical 8401 Capnograph II capnograph (see Figure 1) with cannula was used to measure End-tidal CO₂, heart rate (HR) respiration rate (RR), and O₂ saturation. Cloth face masks and paper face masks were provided to participants, if necessary, to assure an equal distribution of face mask types per group. A normobaric altitude chamber was used to reduce oxygen levels from 20.9% at sea level to 17.61%—the typical oxygen level at an altitude of 5,000 feet. To simulate activities that may occur in an aircraft, aeronautical charts were provided, as well as a nut and bolt to simulate any turning of knobs. A survey (see Appendix A) included self-reports of opinions concerning wearing face masks.

Everything you need to know about masks

July 07, 2020 | by Annemarie Schmocker, RN, BSN, CIC
Categories: Healthy Driven Life

Home | My Health | COVID-19 | Healthy Driven Blogs | Infectious

At Edward-Elmhurst Health, our COVID-19 Steering Committee — a team of health system administrators/senior leadership and clinical department directors/managers — meets regularly to discuss new medical literature and findings, and review guidelines from the Centers for Disease Control and Prevention (CDC), World Health Organization, Infectious Disease Society of America and various medical societies.

Together, we analyze this information and use it to update our infection control and prevention procedures. Universal masking is an important topic on the agenda. Our current recommendations for our community include:

Masks help reduce the spread of COVID-19. It's important to wear a mask or face covering when in public settings, around new people and when social distancing measures are not able to be taken. Masks reduce the spread of COVID-19 to others and when widely used, are most likely to do so successfully. They provide a barrier to individuals who may not know they are infected with COVID-19 and help prevent a person from spreading the virus to others by keeping respiratory droplets (released when someone is talking, singing, coughing or sneezing) contained within the mask. Masks prevent the droplets from reaching others if 6-foot social distancing cannot be maintained. Learn more about how COVID-19 spreads.

Also, some masks are more effective than others, so it's important to wear one that effectively blocks respiratory droplets. Researchers recently tested the effectiveness of various masks and found that three-layer surgical masks and cotton masks performed well, while neck fleeces, folded bandanas and knitted masks performed poorly.

Wearing a mask is safe for most people. Despite an increase in concerns that masks can restrict breathing or cause reduced oxygen levels (hypoxia), there is no current research or evidence to support these claims. Studies have looked at other pandemics where mask wearing was prevalent, such as the SARS outbreak in China in 2002, and have found no

or cannot remove the mask on their own, should not wear mask. The CDC offers alternatives to consider for these special considerations to help reduce the risk of spreading COVID-19. At Edward-Elmhurst Health, we work with individuals who have special considerations on a case-by-case basis to assist with alternatives and maintain safety at all times.

Take regular breaks. Wearing masks for prolonged periods of time can be unpleasant or irritating, especially in warm, humid weather. We encourage taking short breaks when your situation allows you to do so safely. Remember to drink water during breaks to maintain hydration.

Mask removal and mask storage is important. Wearing and caring for your mask is an important part of daily life. We recommend daily washing of cloth masks and the following removal and storage guidelines for both surgical and cloth masks:

- To remove mask with intent to re-use:
 1. Wash hands.
 2. Assume the front is contaminated and remove mask slowly and carefully by grasping ear loops or lower ties and then upper ties. Keep loops or ties from touching interior of mask.
 3. After removing mask, inspect for contamination or any distortions in shape or form. If soiled, torn or saturated, the mask should be discarded.
 4. If the mask is NOT visibly soiled, torn or saturated, carefully place on a clean paper towel or paper bag.
 5. Wash hands.
- To re-apply used mask:
 1. Wash hands.
 2. Grasp mask at the ear loops or upper ties.
 3. Place over face
 - For ear-loop style mask: Secure ear loops behind ears, secure mask.
 - For tie-back style mask: Secure upper ties first, behind head. End by securing lower ties behind head.
 4. Wash hands.

Protecting skin can ease discomfort. Skin or lip irritation or dryness can occur with long-term mask wearing. Use the following tips to avoid irritation:

- Ensure your face mask is dry before using.
- Avoid makeup if possible as it can create moisture under the mask.
- Use a barrier cream like Aquaphor or Cerave to prevent dry skin under the mask.

The bottom line on wearing a mask. These basic infection practices are key to fighting the spread of COVID-19. Wearing a mask, practicing social distancing, washing hands thoroughly, covering coughs and sneezes, avoiding those who are sick and regularly disinfecting surfaces are the most powerful steps we can take to stay healthy and protect ourselves and others from both symptomatic and asymptomatic spread. Even when or if a vaccine becomes available, it will be crucial to maintain these practices and not let our guard down as we wait for immunity to increase throughout our communities.

For updates on our planning and response efforts as we work to stop the spread of COVID-19, please check [EEHealth.org/coronavirus](https://eehealth.org/coronavirus).

The information in this article may change at any time due to the changing landscape of this pandemic. Read the latest on COVID-19.

COVID-19 UPDATES

The following information is based on data for the Stanley-Boyd Area
School District as of Friday, November 6, 2020.

Students Isolated or Quarantined	Staff Isolated or Quarantined	Student Active Positive Cases	Staff Active Positive Cases	Cumulative Positive Cases Since August 20, 2020
131	7	1	3	18

Isolation and quarantine status can be the result of exposure or close contact at home, school, or in the community. Not all individuals in isolation or quarantine are ill or experiencing symptoms.

Please help STOP the spread!

1. WEAR A MASK - remember to mask up on the bus, too!
2. Maintain social distance.
3. Wash your hands often.
4. Stay home if you are ill or show symptoms.

COVID SYMPTOMS - WHEN
SHOULD I STAY HOME?

PREVENT THE SPREAD

Considerations for Wearing Masks

Help Slow the Spread of COVID-19

Updated Nov. 4, 2020 [Print](#)

- CDC recommends that people wear masks in public settings, like on public and mass transportation, at events and gatherings, and anywhere they will be around other people.
- Masks may help prevent people who have COVID-19 from spreading the virus to others.
- Masks are most likely to reduce the spread of COVID-19 when they are widely used by people in public settings.
- Masks should NOT be worn by children under the age of 2 or anyone who has trouble breathing, is unconscious, incapacitated, or otherwise unable to remove the mask without assistance.
- Masks with exhalation valves or vents should NOT be worn to help prevent the person wearing the mask from spreading COVID-19 to others (source control).

Evidence for Effectiveness of Masks

Masks are recommended as a simple barrier to help prevent respiratory droplets from traveling into the air and onto other people when the person wearing the mask coughs, sneezes, talks, or raises their voice. This is called source control. This recommendation is based on what we know about the role respiratory droplets play in the spread of the virus that causes COVID-19, paired with emerging evidence from clinical and laboratory studies that shows masks reduce the spray of droplets when worn over the nose and mouth. COVID-19 spreads mainly among people who are in close contact with one another (within about 6 feet), so the use of masks is particularly important in settings where people are close to each other or where social distancing is difficult to maintain. CDC's recommendations for masks will be updated as new scientific evidence becomes available.

Mask?

Who Should Wear A

General public

- CDC recommends all people 2 years of age and older wear a mask in public settings and when around people who don't live in your household, especially when other social distancing measures are difficult to maintain.
- COVID-19 can be spread by people who do not have symptoms and do not know that they are infected. That's why it's important for everyone to wear masks in public settings and practice social distancing (staying at least 6 feet away from other people).
- While masks are strongly encouraged to reduce the spread of COVID-19, CDC recognizes there are specific instances when wearing a mask may not be feasible. In these instances, adaptations and alternatives should be considered whenever possible (see below for examples).

Key Times to Wear a Mask [520 KB, 3 Page]

People who know or think they might have COVID-19

- If you are sick with COVID-19 or think you might have COVID-19, do not visit public areas. Stay home except to get medical care. As much as possible stay in a specific room and away from other people and pets in your home. If you need to be around other people or animals, wear a mask (including in your home).
- The mask helps prevent a person who is sick from spreading the virus to others. It helps keep respiratory droplets contained and from reaching other people.

Caregivers of people with COVID-19

- Those caring for someone who is sick with COVID-19 at home or in a non-healthcare setting may also wear a mask. However, the protective effects—how well the mask protects healthy people from breathing in the virus—are unknown. To prevent getting sick, caregivers should also continue to practice everyday preventive actions: avoid close contact as much as possible, clean hands often; avoid touching your eyes, nose, and mouth with unwashed hands; and frequently clean and disinfect surfaces.

Who Should Not Wear a Mask

Masks should **not** be worn by:

- Children younger than 2 years old
- Anyone who has trouble breathing
- Anyone who is unconscious, incapacitated, or otherwise unable to remove the mask without assistance

Feasibility and Adaptations

CDC recognizes that wearing masks may not be possible in every situation or for some people. In some situations, wearing a mask may exacerbate a physical or mental health condition, lead to a medical emergency, or introduce significant safety concerns. Adaptations and alternatives should be considered whenever possible to increase the feasibility of wearing a mask.

Coronavirus Disease 2019 (COVID-19)

MENU >

- People who are deaf or hard of hearing—or those who care for or interact with a person who is hearing impaired—may be unable to wear masks if they rely on lipreading to communicate. In this situation, consider using a clear mask. If a clear mask isn't available, consider whether you can use written communication, use closed captioning, or decrease background noise to make communication possible while wearing a mask that blocks your lips.
- Some people, such as people with intellectual and developmental disabilities, mental health conditions or other sensory sensitivities, may have challenges wearing a mask. They should consult with their healthcare provider for advice about wearing masks.
- Younger children (e.g., preschool or early elementary aged) may be unable to wear a mask properly, particularly for an extended period of time. Wearing of masks may be prioritized at times when it is difficult to maintain a distance of 6 feet from others (e.g., during carpool drop-off or pick-up, or when standing in line at school). Ensuring proper mask size and

from others (e.g., during carpool drop off or pick up, or when standing in line at school). Ensuring proper mask size and fit and providing children with frequent reminders and education on the importance and proper wear of masks may help address these issues.

- People should not wear masks while engaged in activities that may cause the mask to become wet, like when swimming at the beach or pool. A wet mask may make it difficult to breathe. For activities like swimming, it is particularly important to maintain physical distance from others when in the water.
- People who are engaged in high intensity activities, like running, may not be able to wear a mask if it causes difficulty breathing. If unable to wear a mask, consider conducting the activity in a location with greater ventilation and air exchange (for instance, outdoors versus indoors) and where it is possible to maintain physical distance from others.
- People who work in a setting where masks may increase the risk of heat-related illness or cause safety concerns due to introduction of a hazard (for instance, straps getting caught in machinery) may consult with an occupational safety and health professional to determine the appropriate mask for their setting. Outdoor workers may prioritize use of masks when in close contact with other people, like during group travel or shift meetings, and remove masks when social distancing is possible. Find more information here and below.

Masks are a critical preventive measure and are **most** essential in times when social distancing is difficult. If masks cannot be used, make sure to take other measures to reduce the risk of COVID-19 spread, including social distancing, frequent hand washing, and cleaning and disinfecting frequently touched surfaces.

Masks with Exhalation Valves or Vents

The purpose of masks is to keep respiratory droplets from reaching others to aid with source control. However, masks with one-way valves or vents allow air to be exhaled through a hole in the material, which can result in expelled respiratory droplets that can reach others. This type of mask does not prevent the person wearing the mask from transmitting COVID-19 to others. Therefore, CDC **does not recommend** using masks for source control if they have an exhalation valve or vent.

Face Shields

- A face shield is primarily used for eye protection for the person wearing it. At this time, it is not known what level of protection a face shield provides to people nearby from the spray of respiratory droplets from the wearer. There is currently not enough evidence to support the effectiveness of face shields for source control. Therefore, CDC **does not currently recommend** use of face shields as a substitute for masks.
- However, wearing a mask may not be feasible in every situation for some people for example, people who are deaf or hard of hearing—or those who care for or interact with a person who is hearing impaired. Here are some considerations for individuals who must wear a face shield instead of a mask:
 - Although evidence on face shields is limited, the available data suggest that the following face shields may provide better source control than others:
 - Face shields that wrap around the sides of the wearer's face and extend below the chin.
 - Hooded face shields.
 - Face shield wearers should wash their hands before and after removing the face shield and avoid touching their eyes, nose and mouth when removing it.
 - Disposable face shields should only be worn for a single use and disposed of according to manufacturer instructions.
 - Reusable face shields should be cleaned and disinfected after each use according to manufacturer instructions or by following CDC face shield cleaning instructions .
 - Plastic face shields for newborns and infants are **NOT** recommended.

Surgical Masks

Masks are not surgical masks or respirators. Currently, those are critical supplies that should continue to be reserved for healthcare workers and other medical first responders, as recommended by current CDC guidance. Masks also are not appropriate substitutes for them in workplaces where surgical masks or respirators are recommended or required and available.

Europe's Top Health Officials Say Masks Aren't Helpful in Beating COVID-19

The top medical experts in the world can't decide if masks are helpful in reducing the spread of COVID-19 or just make things worse.

Thursday, August 6, 2020

Jon Miltimore

[Politics](#) [Masks](#) [COVID-19](#) [Spontaneous Order](#) [Europe](#) [Sweden](#) [Denmark](#)

Denmark boasts one of the lowest COVID-19 death rates in the world. As of August 4, the Danes have suffered 616 COVID-19 deaths, according to figures from Johns Hopkins University.

That's less than one-third of the number of Danes who die from pneumonia or influenza in a given year.

Despite this success, Danish leaders recently found themselves on the defensive. The reason is that Danes aren't wearing face masks, and local authorities for the most part aren't even recommending them.

This prompted *Berlingske*, the country's oldest newspaper, to complain that Danes had positioned themselves "to the right of Trump."

"The whole world is wearing face masks, even Donald Trump," *Berlingske* pointed out.

This apparently did not sit well with Danish health officials. They responded by noting there is little conclusive evidence that face masks are an effective way to limit the spread of respiratory viruses.

"All these countries recommending face masks haven't made their decisions based on new studies," said Henning Bundgaard, chief physician at Denmark's Rigshospitale, according to Bloomberg News. (Denmark has since updated its guidelines to encourage, but not require, the use of masks on public transit where social distancing may not be possible.)

Denmark is not alone.

Despite a global stampede of mask-wearing, data show that 80-90 percent of people in Finland and Holland say they "never" wear masks when they go out, a sharp contrast to the 80-90 percent of people in Spain and Italy who say they "always" wear masks when they go out.

Dutch public health officials recently explained why they're not recommending masks.

"From a medical point of view, there is no evidence of a medical effect of wearing face masks, so we decided not to impose a national obligation," said Medical Care Minister Tamara van Ark.

Others, echoing statements similar to the US Surgeon General from early March, said masks could make individuals sicker and exacerbate the spread of the virus.

“Face masks in public places are not necessary, based on all the current evidence,” said Coen Berends, spokesman for the National Institute for Public Health and the Environment. “There is no benefit and there may even be negative impact.”

In Sweden, where COVID-19 deaths have slowed to a crawl, public health officials say they see “no point” in requiring individuals to wear masks.

“With numbers diminishing very quickly in Sweden, we see no point in wearing a face mask in Sweden, not even on public transport,” said Anders Tegnell, Sweden’s top infectious disease expert.

What’s Going on With Masks?

The top immunologists and epidemiologists in the world can’t decide if masks are helpful in reducing the spread of COVID-19. Indeed, we’ve seen organizations like the World Health Organization and the CDC go back and forth in their recommendations.

CDC 
@CDCgov

CDC does not currently recommend the use of facemasks to help prevent novel #coronavirus. Take everyday preventive actions, like staying home when you are sick and washing hands with soap and water, to help slow the spread of respiratory illness. #COVID19 bit.ly/37Ay6Cm

The truth is masks have become the new wedge issue, the latest phase of the culture war. Mask opponents tend to see mask wearers as “fraidy cats” or virtue-signalling “sheeple” who willfully ignore basic science. Mask supporters, on the other hand, often see people who refuse to wear masks as selfish Trumpkins ... who willfully ignore basic science.

Join us in preserving the principles of economic freedom
and individual liberty for the rising generation

Support FEE's Mission

There's not a lot of middle ground to be found and there's no easy way to sit this one out. We all have to go outside, so at some point we all are required to don the mask or not.

It's clear from the data that despite the impression of Americans as selfish rebel cowboys who won't wear a mask to protect others, Americans *are* wearing masks far more than many people in European countries.

Polls show Americans are wearing masks at record levels, though a political divide remains: 98 percent of Democrats report wearing masks in public compared to 66 percent of Republicans and 85 percent of Independents. (These numbers, no doubt, are to some extent the product of mask requirements in cities and states.)

Whether one is pro-mask or anti-mask, the fact of the matter is that face coverings have become politicized to an unhealthy degree, which stands to only further pollute the science.

Last month, for example, researchers at Minnesota's Center for Infectious Disease Research and Policy responded to demands they remove an article that found mask requirements were "not based on sound data."

The school, to its credit, did not remove the article, but instead opted to address the objections critics of their research had raised.

First, Do No Harm

The ethics of medicine go back millennia.

The Hippocratic Oath famously calls on medical practitioners to "first, do no harm." (Those words didn't actually appear in the original oath; they developed as a form of shorthand.)

There is a similar principle in the realm of public health: the Principle of Effectiveness.

Public health officials say the idea makes it clear that public health organizations have a responsibility to not harm the people they are assigned to protect.

"If a community is at risk, the government may have a duty to recommend interventions, as long as those interventions will cause no harm, or are the least harmful option," wrote Claire J. Horwell Professor of Geohealth at

Durham University and Fiona McDonald, Co-Director of the Australian Centre for Health Law Research at Queensland University of Technology. "If an agency follows the principle of effectiveness, it will only recommend an intervention that they know to be effective."

The problem with mask mandates is that public health officials are not merely recommending a precaution that may or may not be effective.

They are using force to make people submit to a state order that could ultimately make individuals or entire populations sicker, according to world-leading public health officials.

That is not just a violation of the Effectiveness Principle. It's a violation of a basic personal freedom.

Mask advocates might mean well, but they overlook a basic reality: humans spontaneously alter behavior during pandemics. Scientific evidence shows that American workplaces and consumers changed the patterns of their travel *before* lockdown orders were issued.

As I've [previously noted](#), this should come as no surprise: Humans are intelligent, instinctive, and self-preserving mammals who generally seek to avoid high-risk behavior. The natural law of spontaneous order shows that people naturally take actions of self-protection by constantly analyzing risk.

Instead of ordering people to "mask-up" under penalty of fines or jail time, scientists and public health officials should get back to playing their most important role: developing sound research on which people can freely make informed decisions.

See the World Health Organization's Latest Guidelines on Masks and COVID-19

Editor's note: This story was updated to reflect Denmark's recent update on mask guidelines.

Masks, Masks, Masks, Is Our Whole Life Masks?

 3 Comments

By Kevin Roche

August 6, 2020

Commentary

A couple of comments relating to our coronavirus briefing here in the state, before a longer discussion about masks. In the briefing yesterday, a lot of concern about children and other people missing vaccinations, which is an ongoing problem. But zero acknowledgement that this avoidance of medical care is due to the constant and excessive fear-mongering by the Dictator and his minions at the Health Department. Sturgis came up again, that is the new tool of fear. The Commissioner flat-out lied about an upsurge in cases in South Dakota—I immediately went and looked at the data and there is no change, period. And she misled about case growth in Minnesota. Dr. Osterholm, about whom I say some kind words below, chimed in separately, claiming that Sturgis will destroy the entire country. Reminds me of those 50s motorcycle gang movies—watch out, they are coming to rape, murder and create mayhem in your town, only this time they are bringing the dread VIRUS!!

Now, to masks. I have demeaned and berated Dr. Osterholm, perhaps excessively so, perhaps not, for his overall response to the epidemic, which has been far too formulaic and lacked understanding of the nuances of this virus and epidemic.

When someone has the status he has, they have a special obligation to be extremely well-informed and thoughtful. I will say something very positive about the good Doctor. He has pretty much stood his ground on masks, especially cloth

transmission overall. If you haven't read this commentary by Dr. Osterholm, I

strongly encourage you to read it in its entirety. (Osterholm Commentary) While the effects of the pro-mask pressure are apparent, he continues to point to the lack of research showing efficacy, going back as far as the 1918 epidemic. I could have written the following passage from his commentary, in regard to excessive promotion of the benefits of masks:

"These concerns remain true today, particularly after CDC leadership made the unfortunate statement that the US epidemic could be driven to the ground if everyone wore face coverings for the next 4 to 6 weeks. If this were true, why do we need a vaccine to end this pandemic? Just "mask our way" to control. When put into this context, it's obvious how the CDC statement is unrealistic and misleading. Why do places like Hong Kong, which has a requirement for the use of cloth face coverings in public at a risk of a \$HK 5,000 fine, have their highest number of community-acquired COVID-19 cases since the beginning of the pandemic?"

And here are some summaries from a couple of the research pieces he cites. Two studies from a University group doing coronavirus evidence reviews find the same thing as every other review; there just isn't solid evidence that masks play a significant role in limiting transmission. Here is one, on homemade masks specifically. (UNCOVER Review) The second one dealt with the effectiveness in general of face masks in limiting respiratory transmission in the community. (UNCOVER Review) That review also concluded that there was slight, at best, evidence of protective effect, even though laboratory studies would suggest that masks limit droplet spread. Thinking something should work is different from finding evidence that it actually works in the real world.

And it is fascinating to go back and read the work of one the pre-eminent scientists during the 1918 epidemic. (Kellogg Paper) Mask-making technology may or  not have improved since 100 years ago, but from the perspective of what really

experiments to determine airflow and penetration and reviewed results of

epidemic courses in areas where masks were compulsory. Here is his conclusion: “Masks have not been proved efficient enough to warrant compulsory application for the checking of epidemics.” It appear to me that neither the evidence nor that conclusion has changed.

And here is yet another example of methodological mischief to achieve a desired result. There are very few actual trials of mask effectiveness. The same studies are reviewed over and over again by the evidence surveys. These guys, however, decided that they would conduct a meta-analysis of the same five trials, that is a combining of the results, of these trials but would modify the data so that they could ensure it showed masks were effective. (Medrxiv Paper) Here is how they got there. Instead of using the data as it was actually collected, let’s change it to reflect our assumptions about non-compliance behaviors, in other words, let’s ignore real-life human behavior in regard to when and how masks are worn. They literally changed the data as collected and adjusted it, and of course then the results look like masks have more of a protective effect than any of the original studies showed. If you don’t like the results of a study, do your own real study instead of fudging the data from the ones you don’t like. This is trash science conducted for the sole purpose of coming to a conclusion to justify a policy.

The most compelling evidence is that if you look at the regions with mask mandates, and more importantly, at areas with high degree of mask wearing, you see no effect, no correlation between mask use and cases or deaths. That is what matters—what happens in the real world.

I will repeat again, wear them if you want to, but don’t think they are actually protecting you or others to any significant degree.

Thank you, thank you, thank you for being a reasonable voice. What is happening in this country where we complacently accept shut downs and mask wearing as acceptable? "Oh, well, if our political leaders and health officials (the ones that get the main viewership) say this is the way its gonna be than I guess its okay!" We already have one radical-nut-job scientist who has said he thinks goggles should be worn – to prevent the virus or germs from getitng into the eyes!!!

Great article Kevin! Regarding Com. Malcom's statement about SD's case numbers surging. I almost fell off my chair when she said that. I replayed the video to confirm she actually said it. I don't have numbers to bac' 's statement, but I will guess 90% of the attendees at Sturgis are not fr SD? So the level of cases in SD is irrelevant compared to the infection rate

infection rates in SD after the rally. My prediction is the same infection rate as the Northern MN Rodeo?

I would change your last sentence to read, "I will repeat again, wear them if you ARE BEING FORCED TO, but don't think they are actually protecting you or others to any significant degree."

Dan Waller

I especially like the message that should have been given earlier on: "We don't know how well cloth masks work, so distancing should come first, but masks are likely to work to some extent and not everyone can distance themselves." Hong Kong didn't receive this message, apparently.

Children under age 5 are not required to wear masks, but are encouraged to do so.

Other exemptions include members of the state Legislature and the state judiciary, as well as people eating and drinking, speakers at religious services, reporters delivering news reports and people who have breathing issues, among others.

Testing School Water for Lead

Dealing with the Problem

In 2015, toxic levels of lead found in the water in Flint, Michigan, brought the dangers of lead exposure, especially to children, into the national spotlight. The Environmental Protection Agency (EPA) regulates and tests public water systems for lead. However, since the federal government does not require testing of drinking water in schools, lead can still leach into school drinking water through the school's plumbing pipes and fixtures.

Any outlet for potable water is a potential source of drinking water, but students and staff more regularly use some outlets for drinking, cooking, or making coffee. Due to the limited funding most districts face, CESA 10 focuses their testing on high priority outlets, such as:

70% OF SCHOOLS TESTED

were found to have at least one fixture contribute to elevated lead water concentrations above EPA action levels

- Drinking fountains, both bubbler and water cooler style
- Kitchen sinks
- Classroom combination sinks and drinking fountains
- Home economic room sinks
- Teacher's lounge sink
- Nurse's office sink
- Any sink known to be or visibly used for consumption (i.e. coffeemaker or cups)

How to Participate

CESA 10 follows the EPA's guidelines as outlined in the *3Ts for Reducing Lead in Drinking Water in Schools* to ensure accurate testing. If you are interested in testing your school building's water for lead, participation is easy:

1. Contact your Environmental Health and Safety (EHS) Consultant or call 888-947-4701 to request a quote.
2. An EHS Consultant will work with you to identify your testing needs.
3. An EHS Consultant or Technician will schedule and complete the testing.
4. You will receive a formal report after testing is completed with your results. If lead water concentrations above EPA action levels are found, CESA 10 will work with your district to develop a plan of action.

I worked with CESA 10's environmental project consultants as the superintendent of two different districts. With all the compliance and liability issues surrounding ecological hazards, it's worth it to have CESA 10 watching out for the community at all times.

**– Joe Zydowsky, District Administrator
School District of the Menomonee Area**

Frequently Asked Questions

Who is at risk for lead in water in school facilities?

Children are most susceptible to lead exposure because their bodies absorb metals at higher rates than the average adult. Children exposed to water with lead can suffer from damage to the brain, nervous system, red blood cells, and kidneys and can potentially cause lower IQs, hearing impairment, reduced attention span, hyperactivity, development delays, and poor classroom performance.

Building staff are also at risk for lead exposure, linked to increased blood pressure, nerve damage, decreased fertility, and hearing and vision impairment. Pregnant women and their fetuses are especially vulnerable to lead exposure.

How does lead get into the schools water system?

Lead can enter the system by leaching out from components such as domestic piping, faucets, and fixtures that contain lead-based solder. Lead contamination may also enter the building from municipal or well sources such as lead service lines, meters, or main services lines.

Who should perform the testing?

The EPA recommends trained personnel with knowledge of lead testing protocols, and laboratory sample preparation protocols should test the water in school buildings. Additional water chemistry tests may be needed to determine source contamination, such as corrosiveness, alkalinity, hardness, and pH.

How do you test for lead in water at a school?

Evaluate all "potable" drinking sources in the facility. This testing includes drinking fountains, classroom sinks, and kitchen areas. Sampling involves collecting a "first draw" sample and a "flush" sample at each location. Testing should follow EPA protocols that include allowing 8-18 hours of stagnant water in the domestic water lines. Collect samples before the facility opens and begin using any water. An analysis of the water supply from the municipal or well source is needed to determine source water treatments and chemistry such as corrosion control applications and water distribution data.

If the water samples test positive for lead, what happens next?

Replace any components (e.g. fixtures, pipes) determined to be the source of contamination. If unable to control the source of contamination, install lead water filter devices. Additionally, until component replacement or filter installation can be completed, the water supply should be turned off to those components/areas, or implement flushing protocols.

Does the State of Wisconsin require Lead in Water testing in school buildings?

Currently, WI State Senate Bill 423 is being proposed to mandate lead water testing in all school buildings and daycare centers. The United States EPA recommends lead water testing of all school buildings to evaluate exposure risks and liabilities.

Project Summary

Project Location Colby K-12 Schools

Project Description Lead water sampling and analysis of Colby HS, MS, and Elementary potable water locations utilizing EPA protocols.

Terms and Conditions

1. Services. Contractor shall provide to you ("Client") certain hazardous substance inspection and sampling services on the premises as described in the Proposal ("Sampling"), send samples collected by Contractor to a certified laboratory for the analysis of certain hazardous substances as described in the Proposal ("Testing"), and then report the results of the Testing to Client ("Reporting"). Contractor may also be engaged to provide Client with abatement, remediation, removal and/or response action efforts as described in the Proposal ("Abatement," and together with the Sampling, Testing, and Reporting, the "Services").

2. Price. The price of the Services is the price stated in the Proposal ("Price"). Unless otherwise agreed to in writing by Client, the Price shall include all charges for insurance, transportation and any federal, state or local tax that may be levied upon the Services or the Client by reason of the sale, delivery or use thereof.

3. Right of Entry. Client shall provide for Contractor's right to enter the premises from time to time in order for Contractor to

8. No Special or Consequential Damages. Contractor and Client agree that, to the fullest extent permitted by law, neither Contractor nor Client shall be liable for any special indirect or consequential damages whatsoever, whether caused by negligence, errors, omissions, strict liability, breach of contract, breach of warranty or other cause or causes whatsoever.

9. Discovery of Unanticipated Hazardous Materials. If pollutants or hazardous materials are discovered that pose unanticipated risks ("Unanticipated Hazardous Materials") while Contractor is performing the Services, Contractor shall immediately stop performance of the Services and notify Client. Client authorizes Contractor to take measures that in Contractor's sole judgment are justified to preserve and protect the health and safety of Contractor's personnel and the public, and Client agrees to compensate Contractor for the additional cost of performing such protective services. If Contractor discovers Unanticipated Hazardous Materials, the parties agree that the Services and Price will be reconsidered and that this Agreement shall immediately become subject to renegotiation or termination. In the event this Agreement is so terminated, Client agrees to pay Contractor for Services

fulfill its Services. Contractor shall obtain any necessary permits, approvals and/or regulatory consents necessary to perform the Services.

4. Standard of Care. Contractor shall be appropriately trained and certified to perform the Services and utilize personnel of required skill, experience, qualifications, training and certifications in a timely, workmanlike, and professional manner, and in accordance with that level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions. Client understands Contractor will use reasonable care to minimize damage to property on the premises, but Client understands that use of sampling equipment may unavoidably cause some damage to property, the correction of which is not part of this Agreement.

5. Invoices and Payment. Invoices for Services will be submitted to Client by Contractor when the Services are completed. Invoices will be due within thirty (30) days of receipt. Amounts unpaid within such 30-day period shall bear interest at a rate of twelve percent (12%) per annum.

6. Independent Contractor. It is understood and acknowledged that Contractor will provide the Services in the capacity of an independent contractor and not as an employee or agent of Client. Contractor shall control the conditions, time, details, and means by which Contractor performs the Services. Contractor has no authority or obligation to commit, act for or on behalf of Client, or to bind Client to any obligation or liability.

7. Insurance. Until completion of the Services, Contractor shall secure and pay for (i) commercial general liability insurance in an amount no less than One Million and No/100 Dollars (\$1,000,000), and (ii) workers' compensation insurance on Contractor's employees as required by law. All insurance shall be held with financially sound and reputable insurers.

performed. If, without negligence on the part of Contractor, Contractor is held liable by a government agency for the cost of abatement or remediation of a hazardous material or substance solely by reason of performing the Services as described in the Agreement, the Client shall indemnify the Contractor for all cost and expense thereby incurred to the extent permitted by applicable law.

10. Miscellaneous.

1. This Agreement shall be construed and governed by the laws of the state of Wisconsin. All disputes, controversies, claims, or causes of actions, concerning this Agreement shall be commenced, tried, and litigated only in Wisconsin State Circuit Court for Dane County.

2. This Agreement constitutes the entire agreement between the parties; and all prior discussions, negotiations, and oral and written agreements are merged herein. If any term or provision of this Agreement is invalid, illegal, or unenforceable in any jurisdiction, such invalidity, illegality or unenforceability shall not affect any other term or provision of this Agreement or render unenforceable such term or provision in any other jurisdiction.

3. This Agreement shall be binding upon and shall inure to the benefit of the parties hereto and their heirs, legal representatives, successors and assigns.

SCHOOL DISTRICT OF COLBY EDUCATION CENTER

Dr. Steven Kolden, Superintendent

Burnett Transit Addendum for 2020-2021 **With the Colby School District**

Cancellation

Burnett Transit is dedicated to supporting the **Colby School District**, its students and their families as the parties adapt to new circumstances. To ensure the continued safety of every student and to allow **Burnett Transit** to retain its licensed, trained and qualified drivers, the student transportation company has included this cancellation policy in the transportation contract.

If the academic year is terminated or if on site learning is canceled by the **Colby School District** (i.e. virtual Wednesdays), state or federal government authority before the end of this contract term due to reasons of the COVID-19 pandemic, the school district agrees to pay 76% of the agreed upon service price for the 2020/21 academic year prorated for payments received. NOTE: (76% covers only the regular bus routes, not extra-curricular trips or special needs routes)

Payments will be made according to the payment schedule agreed to by **Burnett Transit** and the **Colby School District**.

This cancellation policy was negotiated and agreed upon between **Burnett Transit** and **the School Board of the Colby School District** and is in effect specifically for COVID-19 cancellations and is not applicable to other emergency cancellation reasons not connected to COVID-19.

II. Adapting to Change

This language allows **Burnett Transit** to offer the agreed upon reduction of the service contract that makes the most sense to adequately support **Burnett Transit** as a local business while taking into consideration the ongoing needs of the **Colby School District**.

Conclusion

Flexibility will be a key factor in the successful navigation of the months ahead. Student transportation companies will be better positioned to adapt to changing academic schedules if they can ensure they are paid appropriately for planned services.

In agreement to this addendum, the following have signed:

School Board President Date

Burnett Transit Date
