

EVALUATION OF PROFESSIONAL STAFF

In Order to assure the improvement of teacher competence and to advance the instructional programs of the Colby School District, a continuous program for teacher evaluation shall be established.

The Board directs the District Administrator and the administrative staff to develop evaluation procedures and techniques.

All teachers will be formally evaluated at least yearly during their probationary period and upon completion of the probationary period, at least once every three years thereafter. Principals will work out a plan whereby this is accomplished and may call on other supervisors where necessary for assistance.
