

Kings Corners

One method uses a tableau consisting of 16 cards, arranged in a 4-by-4 grid. In this version, players may only move kings to the corners, queens to the left and right center tableaux, and jacks to the top and bottom center tableaux. Players then fill the remaining tableaux, removing pairs of cards with a total value of 10 to free up the tableaux for additional cards, attempting to play the entire deck without running out of room.

Pyramid Solitaire

Pyramid Solitaire is a fun solitaire game, with a very distinctive opening tableau in the shape of a pyramid. There is a lot of luck involved, but there are certain strategies that you can use to dramatically increase your chances of winning.

The aim of pyramid solitaire is to remove all the cards from the tableau and the talon. Cards are removed in pairs, when their combined total is 13. (Except for Kings, they are just moved on their own)

Cards can only be removed when they are completely exposed, with no other cards overlapping them.

The combinations of cards you can remove are:

- King
- 6 and 7
- 5 and 8
- 4 and 9
- 3 and 10
- 2 and Jack
- Ace and Queen
